

**Dear Sir/Madam**

With this letter, I wish to express my strong interest in working with Branding & Advertising, and Illustration alongside the Graphic Design industry.

I am writing with regards to your position in your association. I graduated with Ba Honours in Graphic Design. I feel between my formal & Non-formal education my practical experience gained during university, it has well prepared me for a position as a Graphic Designer.

While I was in University I learnt how to design and tweak logos, brochures, signs, illustrations and graphics for web pages also with their social media platforms. We were privileged as students to have access to the design studio with a range of computer technologies. I am proficient on the Adobe Creative Suite, Illustrator, Photoshop, InDesign, Premier Pro and also After effects. For 2D graphics, I plan to stay current with all new technological developments in computerised graphic design and 3D animation through experience.

During my spare time I also took interest in doing some freelance work, allowing myself to make a name in the graphic design world. As a highly creative and imaginative person, I have a natural ability to work as part of a team and share ideas and experiences and this is evidenced in my creative portfolio. I have great time management experience working on different briefs.

I would highly appreciate it if my application to you was considered as I believe I can bring great value and skills to your department. Thank you

Yours faithfully,

**Mohammed Usmaan Suleman**
